

PATRICIA ANTLITZ

SOFTWARE ENGINEER

PROFESSIONAL EXPERIENCE

General Assembly, Boston MA

Jan. 2020 – Apr. 2020

Software Engineering Immersive

- Successfully completed 500+ hours, 12 weeks Software Engineering Immersive program on front and back-end development in a variety of programming languages and technologies with additional self-study time.
- Designed and built full-stack applications both in teams and individually, utilizing the mentioned technologies as well as Heroku for version control.

PROJECTS:

TIC-TAC-TOE: Web application that allows credentialed user to play a tic-tac-toe game locally. Interacts with a third-party API to store user's, games and moves information. Application was built using *JavaScript, jQuery, HTML, CSS, SASS* and *Bootstrap*.

SAVVY PAWS: Full-stack one-page web application for keeping record and sharing pictures of the user's pets. Database is available to authenticated user, but the application allows a single user to see all pet's information in the database and only update or delete its own. Back-end built using Ruby on Rails and PostgreSQL and front-end built with *JavaScript, jQuery, HTML, CSS, SASS* and *Bootstrap*.

PROJECT #3:

PROJECT #4:
