PATRICIA ANTLITZ
SOFTWARE ENGINEER

RECENT PROFESSIONAL EXPERIENCE

General Assembly, Boston MA   Jan. 2020 – Apr. 2020
Software Engineering Immersive

- Successfully completed 500+hours, 12 weeks Software Engineering Immersive program in person and remotely on front and back-end development in a variety of programming languages and technologies with additional self-study time.

PROJECTS:

TIC-TAC-BRO: Individually built front-end web application that allows credentialed user to play a tic-tac-toe game online. This application interacts with a third-party API to store user's, game and moves. This website was built using *JavaScript*, *jQuery*, *HTML*, *CSS*, *SASS* and *Bootstrap.*

SAVVY PAWS: Individually built full-stack one-page web application for keeping record and sharing pictures of the user's pets. Logged in page shows the list of all pets in the database with pictures. The back end was built using *Ruby on Rails* and the front-end using *jQuery.*

POLLARIS SURVEYS: Full Stack application built as a group project. The application allows a user to create, edit delete and take surveys. All answers are recorded in the database. This application's back end was built using *MongoDB, Mongoose, Express.js* and *Node.js*

HIRED: Hired is an online full stack application that allows a user to create a personal profile. The profile showcases the user's skills as a candidate for a job based on the candidate's title. The idea came from virtual meetups and job search websites. In this case an employer can look into candidate's information on file. This application was built using *React* on an *Express API*.
